

## POLITICS

**PLASTIJET, S.L.** To increase its presence in the market of plastic injection and components for electronic industrial machinery needs an optimal management of its resources. To achieve this goal, it requires an effective quality policy suited to the expectations and needs of our customers. In this way, it is intended:

- Satisfy the needs of our customers.
- Actively collaborate with our clients in the development of their products.
- Comply with legal and regulatory requirements.
- Improve the logistics management of materials.
- Facilitate the implementation of technical improvements of products and processes.
- Progressively reduce the costs of non-conformities.
- Contribute to the maximum professional and personal development of all employees.
- Improve organizational structures.

The management of **PLASTIJET** is the maximum responsible for the quality of the products manufactured and distributed, as well as the service offered to customers. Regularly reviews the quality policy and establishes the corresponding quality objectives.

The management of **PLASTIJET** delegates to the person in charge of quality the implementation, follow-up and awareness of the necessary actions that allow the attainment of the objectives in terms of quality. For this, a quality management system according to ISO 9001 is implemented.

All the personnel of **PLASTIJET** is committed to comply with the guidelines given by the management of the company in terms of quality, with the aim of continuous improvement.

This quality policy is understood, implemented and maintained up to date at all levels of the organization, and has the full commitment and support of **PLASTIJET's** management, who establishes, develops and applies it through the implemented quality system .
